

HeliOffshore Annual Conference and AGM 2018

Grand Hotel Dino, Baveno (on Lake Maggiore) Italy

Theme: Delivering our Priorities. Focus on how HeliOffshore stakeholders work and invest together to deliver and implement the safety objectives that we have identified as having the most potential to save lives. We intend to have a strong emphasis on what specific next steps and changes have to happen to ensure effective implementation industry-wide.

Objectives: Our primary goal for the conference is that all stakeholders are fully engaged in our joint efforts to deliver key safety objectives, and are ready and able to contribute to completing and implementing these programmes.

Guest Speaker: Richard Noble, developer of the ThrustSSC jet-propelled car, which holds the world land speed record will address the conference on how his team combined safety with pushing automotive performance to the edge.
