

## **HeliOffshore Annual Conference and AGM** ***Budapest 13-14 May 2017 (with social events before and after)***

### **Objectives**

HeliOffshore is all of us, our members, working together to achieve our joint commitment to safety in our industry. We have built strong foundations in the last year and will need to use these to face the challenges ahead. We agree that loss of life is unacceptable. Therefore, at this conference we will **build on the foundations of our collaboration to deepen our ability to deliver our safety priorities.**

Global decision makers coming together for safety is a powerful force to ensure we deliver the safety results our industry requires. Listening to your feedback from our conference last year, we will use the combined knowledge and experience in the room even more this year.

### **Design principles**

- Highly interactive
- Focused on value and frontline difference
- More/full integration between operators, manufacturers and clients
- Action/results orientated
- Consideration that what is possible continues to evolve, look at what we need to put in place, practically speaking, to make the most of what is now possible, and what else might be possible going forward.

### **Proposed focus areas**

- **Value** – Creating a business environment that promotes safety improvement
- **Safety Performance** - A new perspective on supporting Human Performance
- **Safety Intelligence** – Effective information sharing for data driven decisions
- **Reliability and Resilience** – Fostering innovation and partnership
